

# **MOVIE FINDER APP (FLUTTER)**

**SAMY T Y**

# PROJECT OVERVIEW

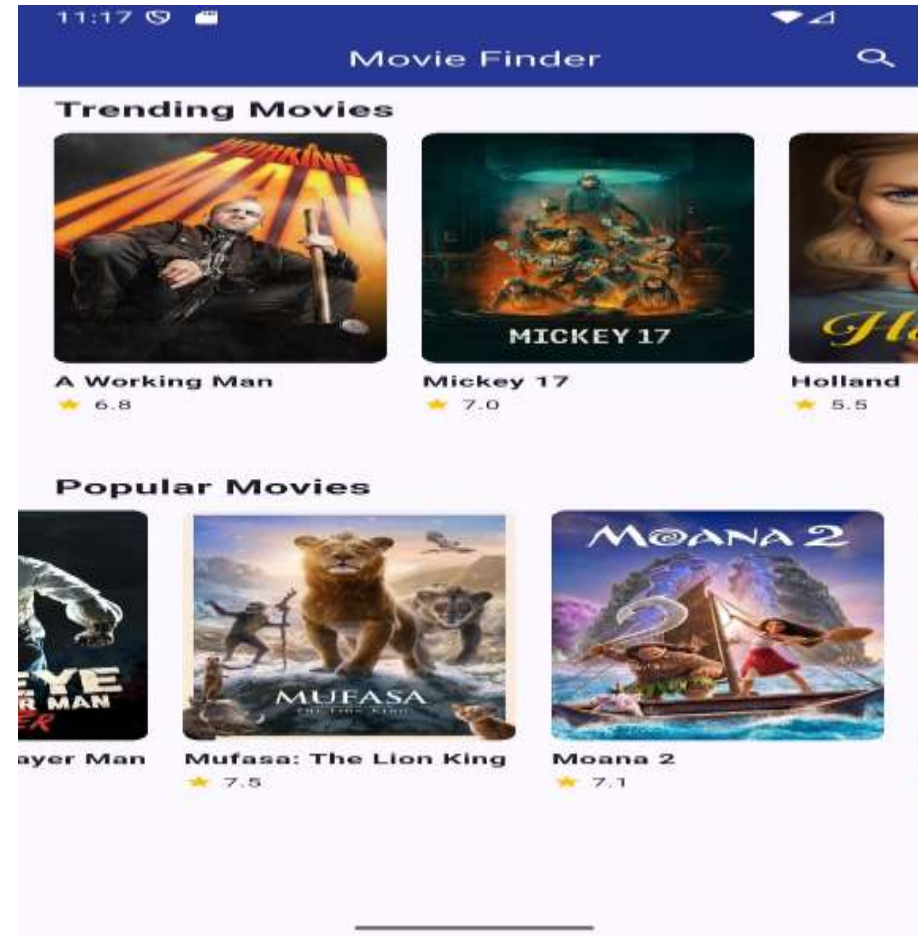

This project is a movie finder web application built using Flutter. It provides users with an intuitive interface to browse, search, and watch movie details seamlessly. The app integrates with TMDb API to fetch real-time movie data, including trending films, genres, and detailed descriptions. It includes features like dynamic movie listings, a search bar, and a responsive UI to enhance the viewing experience.

# HOME PAGE

The home pages consists of the Trending Movies with trending currently in the world, scrolling from left to right with the ratings of the movies which will be convenient for the user

# MOVIES PAGE

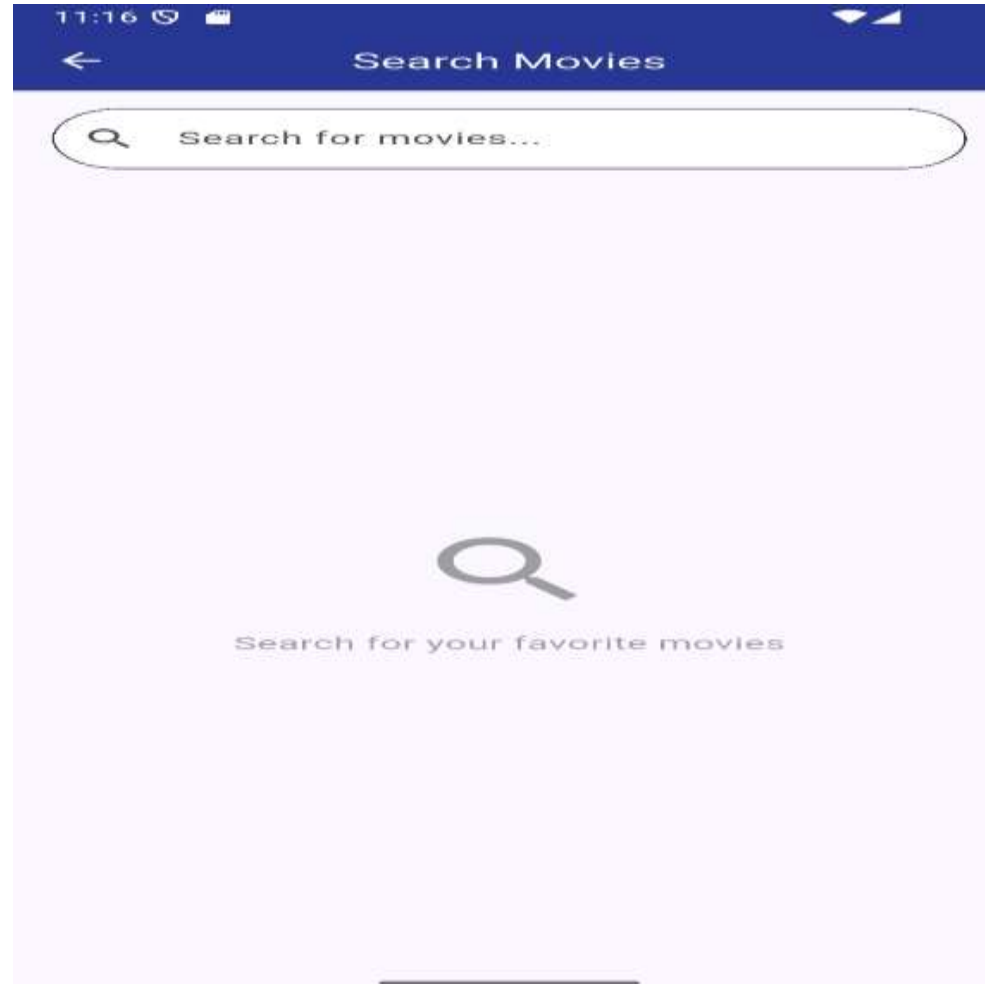

In the second we have the Popular movies section which consists of all the movies that are popular in all timelines ,with the star ratings, which will be a good source for all the movie watchers

# OVERVIEW PAGE

The overview page is opened when the user opens a movie it shows the star ratings given by the IMDB and release date of the movie with the overview of the movie which will explain the plot story of the movie

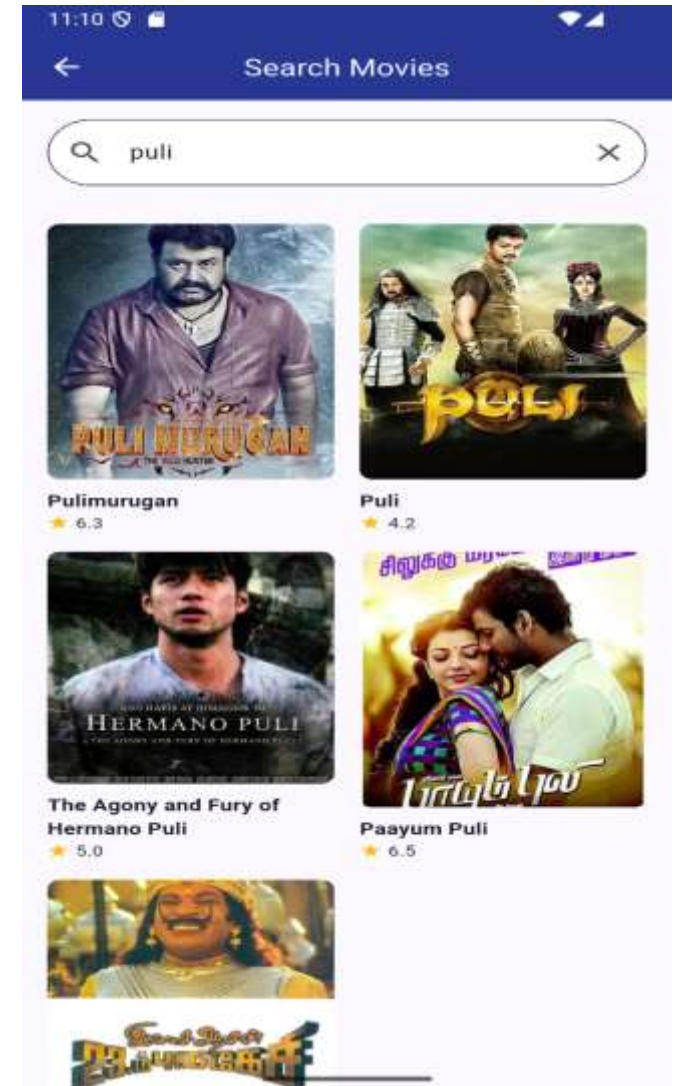

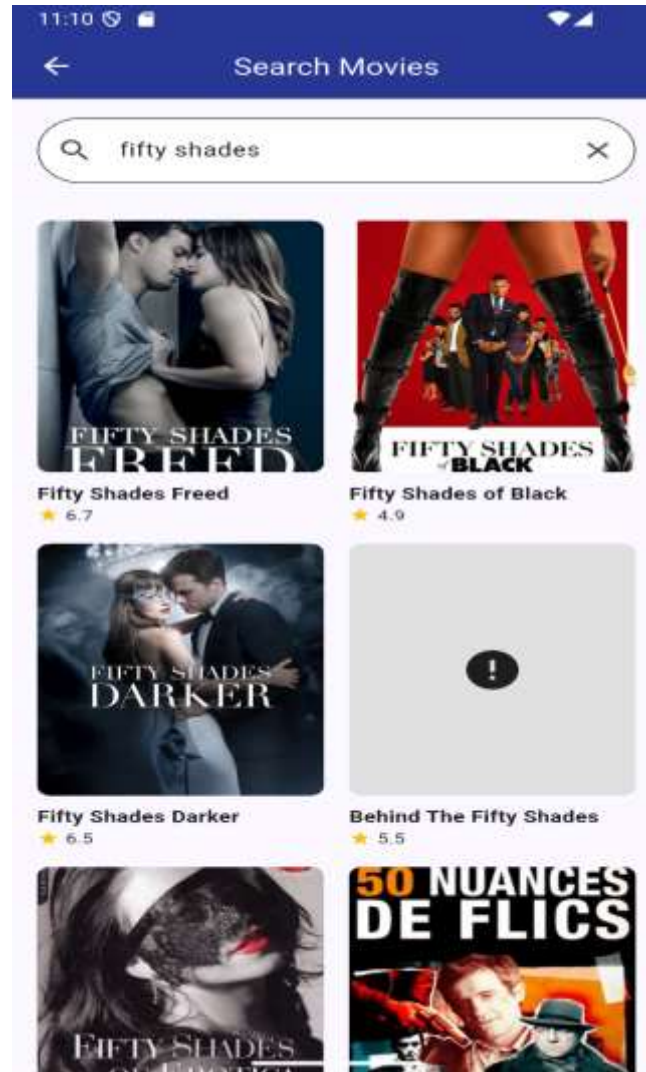

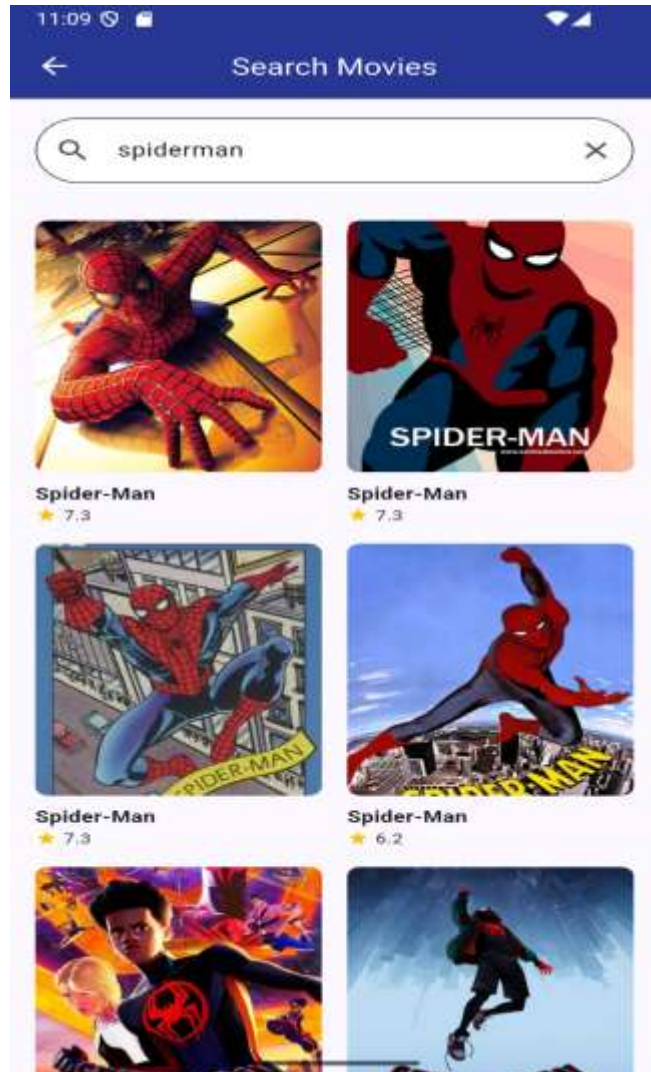

# THE SEARCH BAR

In the Search bar, we search all the movies of all languages by simply typing the name of the movie in the search bar and also we can use the search bar for grouping up separate movies like same actors movies or same language movies. It is helpful in saving time in searching the required movie.
